A Drupal focused Contract Web Developer with a proven track record of developing a diverse range of complex builds.

The ability to understand all aspects of a project and an empathetic nature allows me to expertly combine the technical side of my work with the needs of the team, client and users.

Experience across the full project cycle has given me an informed understanding of development. While my technical expertise, natural feel for usability and trained eye for design ensure my projects are successful and complete.

I am currently based in Vancouver, Canada.

Key Achievements

- Worked for BBC Worldwide in an agile environment on an enterprise level web build
- Created the configurable parallax homepage for Rimmel London's new 22 site roll-out
- Led a team of 5 developers responsible for completely re-branding Scope's digital presence
- Responsible for the full development cycle of multiple projects through quoting, planning, development, testing and deployment
- Approachable technical point of contact for colleagues, clients and 3rd party providers

Note: Sept 2014 – March 2015 was spent travelling in Asia, New Zealand and South America.
